

“Tell Me A Story!”

Histories, Legacies, and Memories of Family, Friends, Colleagues

*The relationships that make up our days give color
and create meaning to our lives.*

How many times have we said we'd love to just recall a casual chat with a loved one, or maybe someone with whom you share a special, unique relationship?

The times we take for granted...telling the stories of a lifetime.

***Storytelling;
Special, Personal &
Preserved for
Future Generations***

“Tell Me A Story” creates an environment that captures those audio memories, stories, voices, sounds.....the music of one's life, We help encapsulate the magic of those conversations, those lifetime songs, resounding from our folk, many of who have passed into star-dust?

“Tell Me A Story!” offers just that...a window into those moments, captured for generations to share.

What we do is come to you, wherever you are, at home, vacation spot, conference room, or long-term care facility, the quiet places most comfortable and most convenient, and quietly setup our recording equipment consisting of a couple of microphones and a laptop computer....Then we turn on the “record” button and let the storytelling begin. We can also video-tape the interview for an added dimension

CURVE CREATIVE SERVICES, LLP

It might take an hour, a day, a week...whatever it requires to capture those moments, the topics, the interview-stories. The time spent is based on our clients' needs. We offer a list of prepared sample questions and interview topics that you might want to incorporate into your session. Our interview facilitator, creative and insightful, will be there to ensure that every word and nuance is captured accurately. The usual session lasts about an hour, but multiple sessions may be arranged too.

After the recording is complete, our sound and video editors will equalize, edit, and, with the collaboration of our client, we'll create a *Storytelling Montage*. We then digitally transfer the conversations onto either a CD that you can play in your home or car; a 'flash or 'thumb' storage disk for you to transfer to your home computer, where you can make copies to share onto a CD/DVD at your leisure. What a wonderful way to capture the stories of a lifetime and pass it on to future generations for years to come.

Along with the audio portion, we also provide the creation of a photo and/or video mosaic, which would include images of your choice. Photographs, video clips, older 8mm Super-8 film transferred to a digital format, and employed as a visual complement to conversation. We can also accompany these moments with 'voiceover' dialogue, songs or the music of your choice from our extensive library of music...from the earliest recordings to the most current. Imagine how comforting a DVD of these captured moments would be to your family, the children, grandchildren and great-grandchildren! These audio/visual experiences are priceless offerings passed along for generations to come.

**Family, Friends, Colleagues...times and treasures...
Close To The Heart.**

What better way to have that special someone...
“Tell You A Story?”
